=====

Brenda,
Did you get the data you need from Todd?

Thanks,
Amy

Do you have the GPS points for the Lorraine SI samples? We are trying to put them on a map and all we have are pdf's of the figures--Today we are above 28.5--we are using an alternate PPE on the Lorraine Refinery side. The data for the release on that side may not met HRS DQO's for observed release but should be sufficient to document the presence of a source (a more qualitative standard than the comparative standard for the O.R.). I think we will be okay as long as we can provide documentation of sources with hazardous waste on the Lorraine portion. The SI identified a contaminated soil area, in addition we may be able to identify some tank bottoms, we are proceeding cautiously optimistic.

Yes, or just to the left of your circle. Todd is sending you a map.
